

QUALITATIVE METHODS SUPPORT FORUM

Clinical Research Centre (CRC), Faculty of Health Sciences

The newly launched CRC is offering support to Faculty staff and students conducting clinical research. This has included facilitating informal meetings between those undertaking specific clinical-research functions or activities. The intention is for us to support each other, particularly as some study team members can feel isolated in their role.

Following on from recent meetings of study data managers and pharmacists, we would now like to invite those conducting qualitative methods related to clinical research to an inaugural meet and greet.

Come along to hear about each other's work and decide on the direction for future meetings. Coffee/tea and cake will be provided!

Date: Thursday 14th August 10:00 - 11:00
Venue: Clinical Research Centre, L Floor (L51),
Groote Schuur Hospital Old Main Building
RSVP: elizabeth.allen@uct.ac.za
