The Cape Universities Body Imaging Centre (CUBIC) UCT, one of the Faculty of Health Sciences' core research facility, is situated adjacent to the Psychiatry block at Groote Schuur Hospital.

The centre hosts Africa's first 3T Skyra magneto whole-body research scanner.

Although the core focus of the centre is research, it is also used for clinical work offering private scans through Beningfield and Associates Radiology.

If you would like to refer patients for a MRI scan at CUBIC please contact:

Beningfield & Associates Radiology
