

Department of Health and Rehabilitation Sciences

Kick-starting dialogue on Decolonisation of Curriculum

2nd announcement

Hello everyone,

On Wednesday 13th of April 2016, the Department of Health and Rehab Sciences will be having a discussion on what Decolonisation of curriculum is, why it is essential and the need for kick-starting the dialogue. This will be a student-led discussion. With that being said, we specially invite you, the students from across the university, to come and engage on your experiences with regards to the curriculum. In addition, we invite the academic staff to join us in this discussion, the first in a series of open discussions in the Department of Health and Rehabilitation Sciences to discuss issues about curriculum transformation/decolonisation of curriculum, and how the education programs in our department may be impacted.

Some of the initial speakers will include students from each of the four undergraduate programs – Audiology, Occupational Therapy, Physiotherapy, and Speech and Language Pathology. In addition, there will be a student from the MBChB program. However, all students present will also have the opportunity to speak about their experiences.

Time: 16h00-17h00

Venue: Grote Schuur Hospital Lecture Theatre 2

*15h45-16h00: Tea/Coffee/Cool drinks will be served in the lecture theatre lobby
