

Invitation to Clinical Research Supervisor's Workshop

The Clinical supervisor's workshop programme is offered to all Departments in the Faculty of Health Sciences and is especially tailored to those who are NEW to supervising MMed's and MPhil's, but may be of interest to other research supervisors in clinical fields. The Deans of the Faculty, the Faculty Research Committee and Research Office fully endorse this initiative to provide support and guidance for those taking on the important role of research supervision for medical registrars in order to improve the quality of theses and papers produced in the Faculty.

The aim of the workshop is to provide information on University regulations, raise awareness of tools available to make the supervisory process a positive and rewarding experience. Clinical divisions or departments are encouraged to nominate new supervisors who they would like to promote to supervisory status and offer them the opportunity of attending the workshop. Once this has been attended CPD accreditation can be obtained.

The programme is being designed and run by Dr Celeste de Jager (Senior Lecturer in Clinical Epidemiology), Dr Delva Shamley (Senior Lecturer in Human Biology) and Henri Carrara (Biostatistician and Analytical Epidemiologist, FHS).

The last course for 2014 will be held on 5th and 6th November: this is a two-part course to allow time for more in-depth coaching for NEW supervisors.
