

# POSTDOCTORAL RESEARCH FELLOWSHIP

Dr Al Leslie is looking for a highly motivated and innovative candidate to join his lab on a fully funded two-year postdoctoral fellowship. You will be part of an international collaborative project between K-RITH, the UMAS and SgN in Singapore, studying the adaptive immune response to TB infection in the human lung.

The immune correlates of human TB immunity remain elusive. Using our state of the art research facilities and unique clinical samples you will study T and B cell responses associated with individual granulomas isolated from TB infected human lung tissue. A good background in immunology and flow cytometry is essential; bioinformatic experience would be a great advantage.

To apply, email [al.leslie@k-rith.org](mailto:al.leslie@k-rith.org) your CV, a cover letter and your academic record.

**VISIT [WWW.K-RITH.ORG](http://WWW.K-RITH.ORG) FOR MORE DETAILS**
