The Council's Water By-Law lays down that buildings such as Hospitals, Hotels, Schools, Office Block, Factories and premises dependent on a continuous supply of water are required to provide sufficient storage for a period of 12 hours and premises of these types should therefore not be inconvenienced by the abovementioned work.

The By-Law also provides that the Council will not be subject to any liability for any failure of the supply caused by damage to works, undertaking of necessary repairs or any other cause.

Die Stadsraadse waterverordening bepaal dat geboue soos hospitale, hotels, skole, blokke kantore, fabriekse of persele wat afhanklik is van 'n voortdurende watertoevoer, 'n voldoende hoeveelheid water vir 'n tydperk van 12 uur in voorraad moet hou en hierdie soort persele behoort dehalwe nie deur bogemelde werk verontrief te word nie.

Die Verordening bepaal ook dat die Raad nie onderhewig is aan enige aanspreeklikheid vir enige onderbreking van die toevoer veroorsaak deur beskadiging van werke, uitvoer van nodige reparasies of enige ander oorsaak nie.
