Clinical Master Class on the Management of Asthma and COPD.

Asthma or COPD does it matter?
What is new in our COPD treatment approach?
Dry powder or pMDI? – How to choose?

Is theophylline a useful drug?
What is available for children with asthma?
Is spirometry essential in general practice?

Inhaled steroids why, when and how much?
When should I step down treatment?
Can you explain how this device works? (Company representatives will be there to demonstrate)

Can we adequately treat our state patients with what we have?
How do I encourage adherence?

Overview: This will be a clinical case-based interactive forum to discuss management of asthma and COPD with expert input.

Who should attend: General practitioners, doctors in primary care/hospital employment and registrars in training. (CPD to be accredited)

Date and Time: 15th October 2016 8:30 to 1:00pm (UCT Lung Institute auditorium)

Cost: R150 (to cover catering and handouts) (space limited to 60 people)

Enquiries/booking: Sheila.scott@uct.ac.za or 021 4066850

Faculty: a/Prof Richard van Zyl-Smit (Lung Clinical Research Unit UCTLI), Dr Jan Vermeulen (Pediatrician Private practice, Emeritus Prof Eric Bateman  UCT Lung Institute,
