Appendix 3 Capabilities of online facilitators

The capabilities outlined here are indicators of what expert online facilitators are expected to be able to do. These capabilities required for facilitating learning online are organised into five categories:

- supporting online learning;
- social skills;
- online communication skills;
- technical skills; and
- social networking skills.

While the course addresses some of these capabilities, we do not expect you to emerge from the course as an expert facilitator. You will become an expert facilitator over a long period of time through practicing online facilitation in different contexts. Each activity addresses a few specific outcomes and builds towards the capabilities outlined below. The specific outcomes and their relation to the capabilities are contained in the tables preceding the activities for each week of the course.

Quality Stage	Beginner	Intermediate	Expert
Supporting online learning	Recognises challenges faced by participants	Recognises challenges faced by participants and provides support to participants	Recognises challenges faced by participants, provides support to participants and anticipates participants' challenges
